

Aviation Safety Analysis Report: January Trends (2007 - 2025)

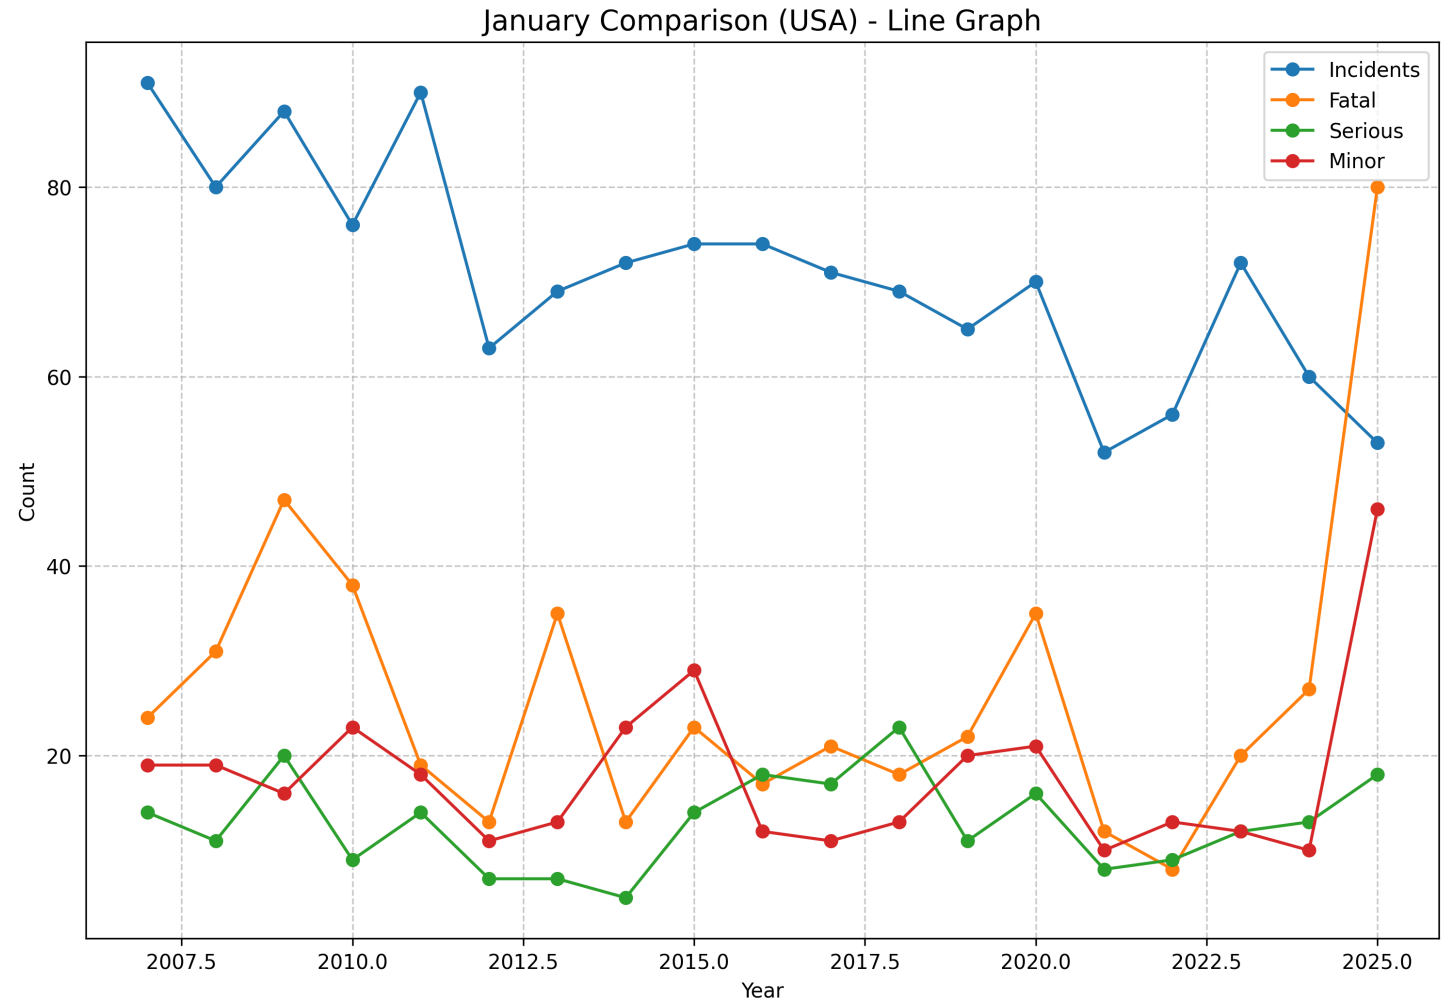

Disclaimer:

This report is based on publicly available [NTSB](#) data and is intended for informational purposes only. It does not represent an official statement from any government agency.

This research report was created by [Project2025Assistant.org](#).

January Comparison (USA)

Despite a decline in total incidents, the severity of aviation accidents has drastically increased in the U.S. The number of fatalities in January 2025 skyrocketed to 80, the highest in recent history. This sharp rise coincides with mass FAA layoffs, regulatory rollbacks, and leadership instability. While fewer incidents may suggest improved safety at first glance, the reality is the opposite—flights have become deadlier than ever before due to the erosion of essential oversight.

All data was sourced directly from the **National Transportation Safety Board** ([ntsb.gov](https://www.ntsb.gov)).

January Comparison (Worldwide)

Globally, aviation incidents in January 2025 remained within historical norms, but fatalities surged disproportionately in the U.S. This suggests that while international aviation standards remain relatively stable, the U.S. is experiencing a crisis. The failure to uphold stringent safety regulations, combined with understaffed air traffic control and lax enforcement, has turned American skies into a growing hazard. The global aviation community is watching as the U.S. becomes an outlier in aviation safety.

US vs. Worldwide Comparison

The most alarming statistic from the January 2025 data is that 92% of global aviation fatalities occurred in the United States. Out of 87 worldwide fatalities, 80 were in the U.S. This catastrophic concentration of deadly crashes highlights a failure of aviation safety oversight within the country. The FAA's recent destabilization undercuts the argument that privatization improves safety—on the contrary, we are witnessing the consequences of gutting public oversight in real-time. If this trend continues, the U.S. will go from being a leader in aviation safety to a global liability.

January Incident Summary (2007 - 2025)

Year	JAN - USA				JAN - Worldwide			
	Number of	Injuries			Number of	Injuries		
	Incidents	Fatal	Serious	Minor	Incidents	Fatal	Serious	Minor
2025	53	80	18	46	72	87	20	51
2024	60	27	13	10	92	48	19	15
2023	72	20	12	12	105	30	15	14
2022	56	8	9	13	90	16	15	19
2021	52	12	8	10	83	99	12	14
2020	70	35	16	21	99	229	18	26
2019	65	22	11	20	84	39	13	26
2018	69	18	23	13	91	37	28	15
2017	71	21	17	11	90	85	29	11
2016	74	17	18	12	100	46	26	21
2015	74	23	14	29	94	36	20	38
2014	72	13	5	23	87	37	11	26
2013	69	35	7	13	84	82	7	22
2012	63	13	7	11	80	27	7	11
2011	90	19	14	18	112	42	24	31
2010	76	38	9	23	94	139	9	29
2009	88	47	20	16	94	49	20	27
2008	80	31	11	19	98	67	14	38
2007	91	24	14	19	102	130	19	29

Aviation in Crisis: FAA Deregulation Turns Deadly

- The January 2025 aviation data paints a grim picture for the future of air travel in the United States. While the total number of incidents has decreased, this does not indicate an improvement in safety. Instead, the severity of crashes has escalated at an alarming rate, with fatalities and serious injuries soaring.
- Key Takeaways from the 2025 Data:
 - 80 of the 87 worldwide fatalities occurred in the U.S. (92% of all global aviation deaths)
 - Fatalities in the U.S. surged to 80, the highest in recorded January trends
 - Despite fewer total incidents, fatal and serious injury crashes are on the rise
 - U.S. is becoming an outlier in global aviation safety, while other countries maintain stability
- This trend is directly tied to the gutting of the Federal Aviation Administration (FAA) under the Musk-Trump administration. The decision to slash critical regulatory staff, push for privatization, and delay FAA leadership appointments has created a perfect storm for disaster.

How Did We Get Here?

FAA Leadership Vacuum

- Trump and Musk forced out FAA Chief Mike Whitaker, leaving no clear leadership in place
- Mass layoffs of regulatory staff left air traffic control centers dangerously understaffed

Deliberate Safety Deregulation

- Inspections and enforcement were scaled back, allowing safety violations to go unchecked
- Pressure from industry lobbyists led to laxer rules on maintenance and pilot training

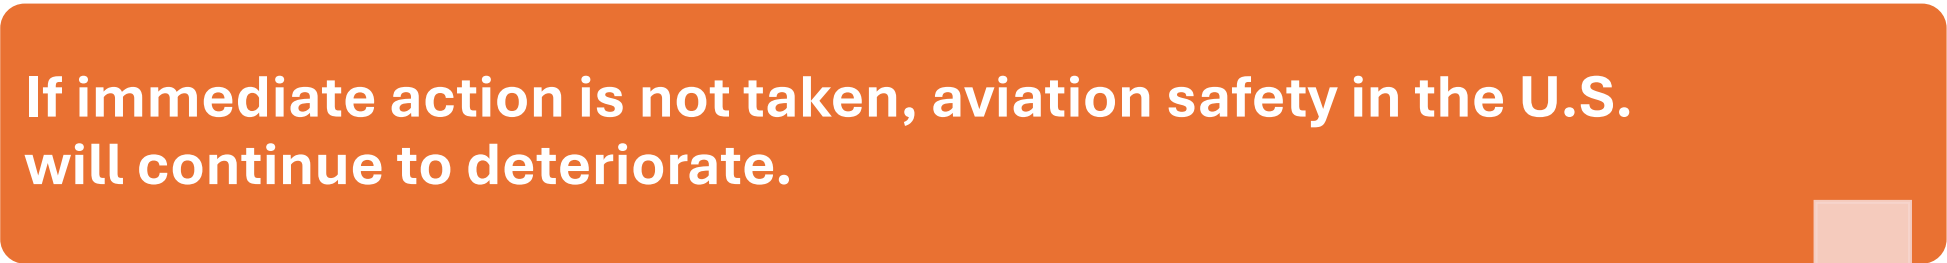

Musk's Push for Privatization

- Musk has exploited the crisis by pushing for SpaceX to take over air traffic control operations
- This is not a safety solution—it is a calculated move to funnel federal contracts into his private empire

What's Next?

If immediate action is not taken, aviation safety in the U.S. will continue to deteriorate.

The FAA must be restored, safety inspections reinstated, and independent oversight strengthened.

Otherwise, the country is headed for more disasters, more preventable deaths, and an irreversible loss of global aviation credibility.

- The devastation caused by the **Musk-Trump administration** extends far beyond aviation safety. From **environmental destruction to attacks on democracy, human rights, and public institutions**, we are witnessing a **deliberate effort to overwhelm and disorient** the public.

- This administration thrives on **chaos, exhaustion, and disengagement**—they **want** you to feel powerless so you stop fighting back. But we **must** push forward. **We are not powerless. We are the resistance.**

We must take action!

**What can
I do?**

How You Can Take Action:

- 📞 **Call Your Representatives**
– Demand accountability from **your senators and members of Congress**. Tell them:
 - **Restore the FAA and regulatory agencies** before more lives are lost.
 - **Stop the privatization of public safety and infrastructure**—Musk's takeover is a disaster in the making.
 - **Hold hearings and demand answers** for the rise in aviation fatalities and deregulation. Find your representatives here:
www.congress.gov/members
- 🦊 **Join Protests & Strikes** – Coordinated action **shakes the system** and forces corporations & lawmakers to respond. Participate in these upcoming events:
 - 📅 **February 28th – Total Economic Blackout**
 - From **midnight to 11:59 PM**, **do not spend a single dollar**. If possible, **stay home** and avoid any financial transactions.
 - Buy **gas, groceries, and essentials before the 27th**.
 - 📅 **March 7th – 14th – Amazon Boycott**
 - **Avoid all purchases** from Amazon and its subsidiaries (Whole Foods, Audible, Twitch, Ring, etc.).
 - 📅 **March 14th – National General Strike**
 - **Workers, businesses, and higher education institutions**—shut it down for **24 hours**.
 - 📅 **April 7th – 14th – Walmart Boycott**
 - **Do not shop at Walmart** or Sam's Club for an entire week.
 - 📅 **April 18th – Economic Blackout #2**
 - A second **one-day spending freeze** to amplify economic pressure.
 - 📅 **April 21st – 28th – General Mills Boycott**
 - Avoid brands like **Cheerios, Nature Valley, Betty Crocker, Pillsbury, Haagen-Dazs**, and more.
- ⚡ **Use Your Voice & Mobilize** – Stay engaged by **organizing, spreading awareness, and attending events**. Websites like mobilize.us list upcoming protests and actions.

StayFocused, Stay Engaged, Keep Fighting

- They **want** us to feel defeated. They **want** us to give up. But we **outnumber them**, and we **have the power to resist**. The future **is not** decided—we **decide it**.
-  **Make your voice heard. Take action. Push back.**
